Place to Visite

Singapore

To enter Singapore is to enter a world of architectural wonders and culinary delights where lush greenery and Eco-Friendly malls coexist in confidence. Here is where friends, families and lovers come to find themselves and each other in a spirit that transcends cultures and new experiences are created every day.

Camping Places

Camping Nissos (Greece)

As soon as spring comes, we start dreaming about the beautiful beaches of Greece and the sky-blue sea.

This place awaits you by the sea to enjoy your camping in a wonderful and green environment in Kastrosykia, Preveza. On site you will find toilets and showers with hot water, a shared kitchen with oven and fridge, laundry service, and a special dry-toilet area. The area is located in an olive grove that offers shady places for your camping, while access to the beach is direct. We provide camping services using your own equipment and camping site for camper motor vehicles.

Tips and Tricks

Take a water carrier

A collapsible water carrier that also easily dispenses water is a camping must-have. There are loads of different designs available, some that are easier to use than others! Go for a water carrier that folds flat to save on space, but remains relatively rigid in use (even when it's not full) as this makes actually dispensing water much easier.

Safety

Helmet

Your helmet is the most important and most identifying piece of your gear. While you may want to purchase a helmet with a color scheme or design that is aesthetically appealing to you, the primary factor of your choice in helmets must be protection.

Most importantly, remember that helmets do not last forever. Even if your helmet doesn't show signs of wear or damage, it will need to be replaced regularly down the road. According to Shoei, its helmets should be replaced five years after the purchase date, or seven years after the production date.
